March 23, 2020

Dear Friends,

This is an unsettling time for our country and our community. Please know that your elected leaders and public health officials are working around the clock to address this public health emergency. Every day more and more is being done to slow the spread of the novel coronavirus (COVID-19), increase testing capabilities, provide critical care to those who need it, and ensure that you and your family are kept informed.

It is important to remember that we need to be prepared, not scared. Heed the advice of public health experts who agree that the most effective way to “flatten the curve,” or slow the spread of the virus, is to practice social distancing. Below is some helpful information regarding COVID-19:

How can you be infected?

- Coronavirus can spread from person to person through respiratory droplets produced when an infected person coughs or sneezes. Because these droplets can travel up to six feet, public health experts advise maintaining six feet of distance from others.
- The virus can also remain on a surface or object and enter the body through the mouth, nose, or eyes.
 - * This is why it is important to wash your hands before touching your face.

How long does it take to show symptoms after being infected?

- It takes 2 to 14 days to develop symptoms after exposure to the virus. The average is about 5 days.

What are the symptoms?

- Fever
- Dry cough
- Shortness of breath

When should you seek testing?

- If you are exhibiting symptoms
- If you have been in close contact with someone who has tested positive for the coronavirus
- If you have recently traveled to one of the high-risk countries

* Except in the case of an emergency, please call your healthcare provider before seeking treatment in person.

While it is normal to feel anxious, there are ways to take control of the situation and be prepared.

Take the following precautions to keep yourself and our community safe:

- Wash your hands often and for at least 20 seconds
- Avoid touching your eyes, nose, and mouth
- Avoid physical contact like handshakes and hugs

- Stay home if you feel sick
- Avoid large crowds
- Abstain from unnecessary travel

What is the difference between “Safer at Home” and “social distancing”? Safer at home is a stricter form of social distancing. There are some differences.

Safer at home means:

- Stay home (stay unexposed and do not expose others)
- Only go out for essential services
- Stay six feet or more away from others
- Don’t gather in groups

During this national emergency, it is imperative that we unite as a community, follow the advice of experts, and take personal responsibility for our actions to #SlowTheSpread of coronavirus.

Below is a list of state and local resources to help you through:

- Ulster County COVID-19 Hotline 845-443-8888
- [COVID19.ulstercountyny.gov](https://www.covid19.ulstercountyny.gov)
- [COVID19.ulstercountyny.gov/Project-Resilience](https://www.covid19.ulstercountyny.gov/Project-Resilience)
 - Ulster County’s Project Resilience is a community fund and local food distribution effort to support residents. Individuals can apply for assistance, and those with the ability, can donate to the fund
- [coronavirus.health.ny.gov](https://www.coronavirus.health.ny.gov)
- NYS Novel Coronavirus Hotline at 1-888-364-3065.

In unity,

David B. Donaldson, Chairman
Ulster County Legislature
