WHEREAS, this resolution has been submitted at the request of the County Executive on behalf of the Ulster County Department of Mental Health; and

WHEREAS, the Ulster County Criminal Justice Reform Task Force – (UC-CJRTF) acknowledged the importance of a robust support system for individuals transitioning out of hospitals, crisis stabilization centers, or other mental health/substance use facilities, or ideally, preventing emergencies that necessitate the use of these facilities altogether; and

WHEREAS, at present, our focus on crisis respite housing should be reconsidered in light of existing conditions, including underutilization of the respite house in Orange County that serves Ulster County residents, indicating that resources can be more effectively deployed to better serve our community's urgent mental health needs before allocating resources to additional crisis respite services; and

WHEREAS, Ulster County has recognized through the establishment of a crisis stabilization center that it is imperative to optimize resource allocation for maximum community benefit, and by prioritizing alternative community programs aligned with more urgent needs, Ulster County will ensure a more comprehensive and effective response to community challenges; and

WHEREAS, the operation parameters to establish and implement Respite Houses in Ulster County have significant barriers, including a lack of housing inventory in certain locations, concerns about program financial sustainability without ongoing County financial contributions, and other logistical challenges that hinder the immediate establishment of such facilities; and

WHEREAS, the federal time frame for dispersing ARPA funds presents additional challenges to dedicating these resources for the purpose of establishing respite houses; and
