Disposition: Resolution ADOPTED

Public Comment: Mrs. Barbara Budik discussed the hazards of the non-public CSX Rail

Crossing in Saugerties, along Kings Highway, and how she has been personally impacted by this issue. She also mentioned that an increased number of large vehicles pass through the area more frequently, changing the nature of the crossing. Mrs. Budik requested that capital be allocated toward a study of this area to correct and secure it. Legislator Litts mentioned that the Committee should send a formal letter to Rail Liaison of the Region 8. Legislator Nolan suggested that the Committee follow up with an email from the Chair to Director of Planning, Dennis

Doyle regarding this concern.

Old Business: The Committee held a Transportation Discussion after resolutions

were voted on.

Chair Petit asked if there was any other business and hearing none;

Summary

This report includes AADT (Annual Average Daily Traffic) and peak hour (4-5 PM) traffic count information for the U.S., state, county and local roads in Ulster County for which traffic count data was obtained in 2005. This report represents the first year of a 3-year rotating traffic count program for Ulster County.

Data Description

Traffic count data for 18 U.S., 38 state, 68 county and 25 local road segments (totaling 149) are included in this report. Of these, 79 counts were taken by Lochner Engineering and coordinated by the Ulster County Transportation Council (UCTC). The remaining 70 counts were taken by the New York State Department of Transportation (NYSDOT). The traffic counts in this report represent the combined total of all lanes of traffic on each road. Therefore, both directions of travel are combined on two-way roads.

There are two tables in this report. Both tables present the same data, each categorizing the data differently. In the first table, the data is categorized by jurisdiction with the US roads first, followed by the state roads, followed by the county roads and then the local roads. In the second table, the traffic count data is categorized by municipality.

The report includes the following data (column header descriptions are shown in **bold**):

Road Name:

The name of the road where the traffic count was measured. The US roads are listed with the United States (US) highway number as a prefix. The state roads are listed with the State Highway (SR) number as a prefix. County roads are listed with the County Route (CR) number as a prefix. The locals roads are listed by their common names.

Station#:

The number of the Traffic Count Station where the count was measured. These numbers were assigned by UCTC for the traffic counts taken by the consultant in 2005 and by NYSDOT for their counts.

Municipality:

The city, village or town where the count was measured. The prefix "C/", "V/" or "T/", indicates city, village or town, respectively.

From / To:

A description of the road segment's beginning and end describing where the count was measured.

AADT:

The annual average daily traffic (AADT) is the number of vehicles that would be assumed counted on a "typical" day of the year. Based on established formulas, a measured traffic count is factored to an AADT by adjusting it for seasonality and vehicle classifications. Adjusting for seasonality is necessary because each season undergoes an increase or decrease in traffic volumes. Counts are adjusted for vehicle classifications since trucks with three or more axles appear as several cars to the counters.

4-5 PM:

For the purpose of this report, the PM peak volume was selected to be between the hours of 4:00 PM and 5:00 PM. Actual PM peak volumes may be higher on some roads at a different hour interval.

Data Sources

The UCTC collected counts on county and local roads. State, Federal, and some selected county road counts were collected by NYSDOT staff.

Maps

The maps on pages 14 through 16 show the locations where the traffic counts were taken. Map 1 shows the locations of NYSDOT and UCTC road counts in the southern area of Ulster County. Map 2 shows the locations of NYSDOT and UCTC road counts in the northwestern area of Ulster County. Map 3 shows the locations of NYSDOT and UCTC road counts in the City of Kingston and Saugerties areas of Ulster County.
